KADHIRAVAN E G

+91 9597645268 kadhiravanegk@gmail.com LinkedIn Github

Cybersecurity Engineering student skilled in secure coding, vulnerability assessment, and system defense. Passionate about building secure, efficient software solutions.

EDUCATION

Sri Shakthi Institute of Engineering and Technology — Coimbatore, TN
Bachelor of Engineering in Computer Science (Cyber Security) - CGPA: 8.6 * — Sep. 2024 – May 2028

Sree Gurukulam Higher Secondary School — Erode, TN
HSE - Mathematics and Computer Science - Grade: 92% — Jun. 2022 – Mar 2024

Govt Hingher Secondary School — Tiruppur, TN
SSLC - Secondary School - Grade: 86% — Jun. 2018 – Apr 2022

SKILLS

Blue Team : SIEM Setup by Wazuh.
Web development : Javascript , HTML , CSS
DevOps : Jenkinis , CI/CD, Prometheus
Languages : Python , Java , Bash , Rust
Continers : Docker
Platforms : Linux , Git , Windows ,Grafana

PROJECTS

Secure-OAuth - Simulation — Dec 2025- Feb 2026

- To secure an hands-on experience in vulnerability simulation, OAuth security, and secure coding to protect enterprise systems from active threats
- Simulated on OAuth token replay vulnerability using a University login system.
- Developed using Python Flask to demonstrate authentication weaknesses.
- This simulation serves as a hands-on tool for identifying and addressing critical OAuth security risks
- Helps learners understand Oauth Replay attacks , Available on Github.

System UX Engineer, XarrowAI Industries — Mar 2025 - Dec 2026

- To learn and Build containerization (Docker), API integrations, and AI-driven development to build and protect resilient software ecosystems.
- Manually finding & fixing errors are more difficult so we add a feature that can auto fix errors.
- This tools improve the understanding the working flow of the program.
- Built using a Python FastAPI backend and a clean JavaScript frontend, the application is also containerised via Docker for easy deployment.
- For more details visit Intelligent-compiler on Github. It is live in Intelligent Compiler.

SELF-DIRECTED TRAINING

- Actively pursued advanced cybersecurity competencies through self-paced, rigorous labs on **TryHackMe** and **Hack The Box**.
- Developed practical skills in **penetration testing**, network vulnerability analysis, and active threat mitigation strategies.
- Completed structured cloud security and infrastructure modules via **Microsoft Learn** to broaden enterprise defense knowledge.

ACHIEVEMENTS

Ultimate DevSecOps Bootcamp - Certificate from Udamy
This course was a deep dive into the world where Development, Security, and Operations come together to create modern, secure software delivery pipelines.

Introduction to Cybersecurity - Certificate from Cisco
This course provided valuable insights into cyber threats, online safety, and how cybersecurity impacts our daily lives and the digital world.
